Clean Set of Claims

A notification module for a voice messaging system, comprising:

 an auto dialing calling module adapted to initiate a communication

with a user at a remote location;

a table associating particular events with a need for notification of said user; and

a controller to activate said auto dialing calling module to send a notification message to said user upon satisfaction of a particular event;

wherein said satisfaction of said particular event is determined based on a comparison of one or more entries in said table to call related information contained in a log.

16. A method for notifying a user of a voice messaging system or other designated party upon satisfaction of a predetermined event based on logged call related information regarding incoming calls, comprising:

logging a plurality of entries of call related information as it is received by said voice messaging system;

reviewing said plurality of entries of logged call related information for satisfaction of a predetermined event by one or more of said incoming calls based on said logged call related information; and

calling a remote user with a notification message in response to satisfaction of said predetermined event.

23. Apparatus for notifying a user of a voice messaging system or other designated party upon satisfaction of a predetermined event based on logged call related information regarding incoming calls, comprising:

means for logging a plurality of entries of call related information as it is received by said voice messaging system;

means for reviewing said plurality of entries of logged call related information for satisfaction of a predetermined event by one or more of said incoming calls based on said logged call related information; and

means for notifying a remote user with a notification message in response to satisfaction of said predetermined event.

24. A telephone answering device comprising:

a controller;

a voice recorder/playback module; and

a calling module activated by receipt of predetermined call related information, said calling module being adapted to initiate a telephone call to a predetermined notification telephone number upon satisfaction of a predetermined event based on received call related information to notify a remote user with a notification message.
